Instructions:
Ship us your old battery-packs along with this form to the address above. Once we receive your battery we will recycle your old cells, weld new cells together in the same configuration with .375 / 1.125 nickel tabs, and reattach your original thermaster and positive / negative connector cap. Once your battery is rebuilt we will run it through our analyzer to make sure it will reach it's full potential after the second charging cycle, we then will ship your battery back to you fully charged.
If you have any questions, please feel free to call: 1-209-541-1100 or Bob's Cell 1-510-393-7700
